Greetings to My Dahlia Friends

It gives me pleasure to present you with my 1938 Catalog and again offer you many popular Dahlias at new low prices.

I regret very much that I have not been able to issue and send out this catalog at an earlier date, but I hope I am not too late to receive your order.

In regards to green Dahlia plants, I will have to discontinue green Dahlia plants for this season, for the reason that I have been playing a losing game by growing these plants because the distance to most of my customers is too far—also the risk and expense is too great, especially at the very low prices that I have offered these plants at. However, this year I have a very large stock of good roots. Consequently, I have marked down the price 20 to 50% on most items.

It pays to buy good roots, instead of plants, while good plants if given the proper care will bloom well. Good roots, if given good cultivation, will often produce a sturdier and stronger blooming plant and does not require the close watchful attention that is necessary to get results, as when you plant green plants.

I never substitute unless requested, however, in case I should be sold out of any kinds ordered, if you will name a second choice, or allow me to substitute I will assure you that I will make a satisfactory selection for you.

Thanking you for past favors and hoping I may have the pleasure to receive your valued orders again this year I am.

Yours very truly,

N. A. MILLER.

Miniature Dahlias

A new type of small Dahlies, same in form as the large Decorative Cactus and Peony Dahlias, but blooms are small, only 2 to 4 inches across, have wire-like stems, are excellent cut flowers. Will keep for days, in water and work in nicely with other garden flowers.
